

**Honeywell**

HONEYWELL

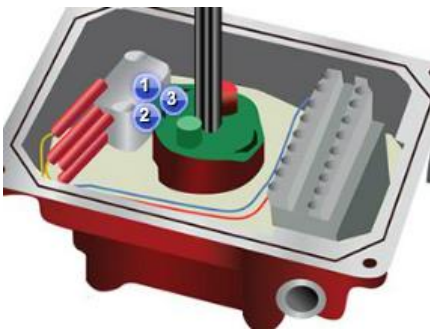

## PRODUCT APPLICATIONS

---

- **Elevator**

GLS series limit switch for lift position and buffer system switch. GLS series meets safety standard as it is positive breaks contact that. Its 50mm rubber roller option make it more quiet operation and the larger size increase the reliability over elevator life.

- **Valve Monitors and Indicators**

V15 series and BZC series snap-action micro switch can used for continuously monitor of valve position through cam or actuator within the monitoring housing. Reliable switch performance reduce the need of service calls. The easy installation also reduces overall cost.
